Reasons for Allowance

1. Claims 1-20 will be allowed.
2. The following is an examiner's statement of reasons for allowance.

The prior art references most closely resembling the applications claimed invention are Takeuchi et al (6,321,260) and Ghonno (U.S. 6,404,739).

First Takeuchi discloses transferring continuous media data such as voice data and moving picture. However Takeuchi did not disclose "wherein said transmission occurs in consecutive cycles, said at least one amounting to a quantity that differs depending upon whether said predetermined time is synchronized to said cycles" (claims 1,3).

Second Ghonmo discloses the receiver recognize whether they have successfully received the data transmitted via the broadcasting link 2, and store the successfully received data. The data stored in the receiver 3 to 3 are, for example displayed or output as sound according to a predetermined operation performed by the user. Accordingly, the transmitter 1 is designed to transmit packets constituting data a predetermined number of times, which increases the possibility that the receivers can successfully receive the data. The packet transmission may not be repeatedly performed but may be repeatedly performed until a predetermined time elapses. However Ghonmo did not disclose, "wherein said transmission occurs in consecutive cycles, said

at least one amounting to a quantity that differs depending upon whether said predetermined time is synchronized to said cycles" (claims 1,3).

In summary, the Examiner submits that there is no motivation to combine the aforementioned references; therefore, claims 1-20 have been deemed allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
